

TENNESSEE DEPARTMENT OF FINANCE AND ADMINISTRATION
Enterprise Solutions Architect Supervisor

Job Summary: The Enterprise Solutions Architect Supervisor reports to the Chief Solutions Architect (CSA) within Strategic Technology Solutions (STS) and is responsible for leading a team of IT professionals in the design of enterprise system architecture. The primary output of the team is holistic system designs that are informed by, and aligned with, business needs of the executive branch agencies. Designs developed by the team comprehend security and compliance, redundancy, availability, capacity, load balancing, enterprise data architecture, disaster recovery and other applicable technology considerations. An employee in this class provides leadership, supervision, and mentoring across the solutions architecture team.

Responsibilities:

- Work with the CSA to develop and mature the organization's architecture mission, vision, guiding principles, policies, objectives, and initiatives.
- Oversee the creation of architectural documentation from initial concept creation through the completion of the design.
- Work with the CSA to develop and mature the process of maintaining the integrity of architectural artifacts through disciplined change management.
- Identify innovative architectural solutions that address unmet needs and optimize the use of state resources.
- Identify architectural solutions that enable the development and deployment of enterprise services that can be used by multiple agencies.
- Work closely with the technology research team to identify and leverage emerging technologies applicable to enterprise architecture and services.
- Collaborate with other groups in STS to assure an efficient and effective transition of the design into an operational status.

Minimum Qualifications: Bachelor's degree in an IT or Business related field. Relevant professional information technology experience may be substituted for the required degree.

- Five years of experience in design, support and/or implementation of one of the following: Networking (firewalls, NAT, DNS, TCP/IP, subnets, vlans, load balancers); Server Virtualization; Enterprise Class Operating Systems, Windows, Linux or Unix; SANs (replication); Enterprise backup solutions; Relational database solutions; security (network, server, application); Disaster Recovery; or Enterprise applications such as ERP, CRM, BI, etc.
- Five years of managerial experience.
- Experience working with Executive Leadership to create IT vision and IT strategies.
- Excellent interpersonal, written, and verbal communication skills.
- Excellent time management, organization, and prioritization skills.

Preferred Qualifications:

- Prior experience leading enterprise solutions initiatives.
- Prior state government experience is a plus.

Competencies:

- Composure
- Creativity
- Customer Focus
- Dealing with Ambiguity
- Decision Quality
- Directing Others
- Functional/Technical Competencies
- Problem Solving
- Strategic Agility
- Time Management
